

Changes to *Exploring Plants and Animals*

Due to availability of living organisms, your STC–Kindergarten *Exploring Plants and Animals* includes organisms that are different from what is listed in the Teacher’s Guide. To accommodate this, several replacement pages have been provided. Please replace the corresponding pages in your Teacher’s Guide with the revised pages provided.

This errata set includes the following:

Tab 5, Lesson 5, Part A

Lady beetles have been substituted for milkweed bugs. For the activities in this lesson, simply substitute the term “lady beetle” for “milkweed bug” when providing instruction to students.

Tab 5, Lesson 5, Activity Sheet A1

A new version of this activity sheet that uses the term “lady beetle” is provided. Please use this version of the sheet in place of the version included in the Teacher’s Guide.

Tab 5, Lesson 5, Activity Prompts A1

A new version of the activity prompts that uses the term “lady beetle” is provided. Please use this version of the sheet in place of the version included in the Teacher’s Guide.

Tab 5, Lesson 5, Part C

Lady beetles have been substituted for milkweed bugs. For the activities in this lesson, simply substitute the term “lady beetle” for “milkweed bug” when providing instruction to students.

Photocopy and distribute these replacement pages as needed.

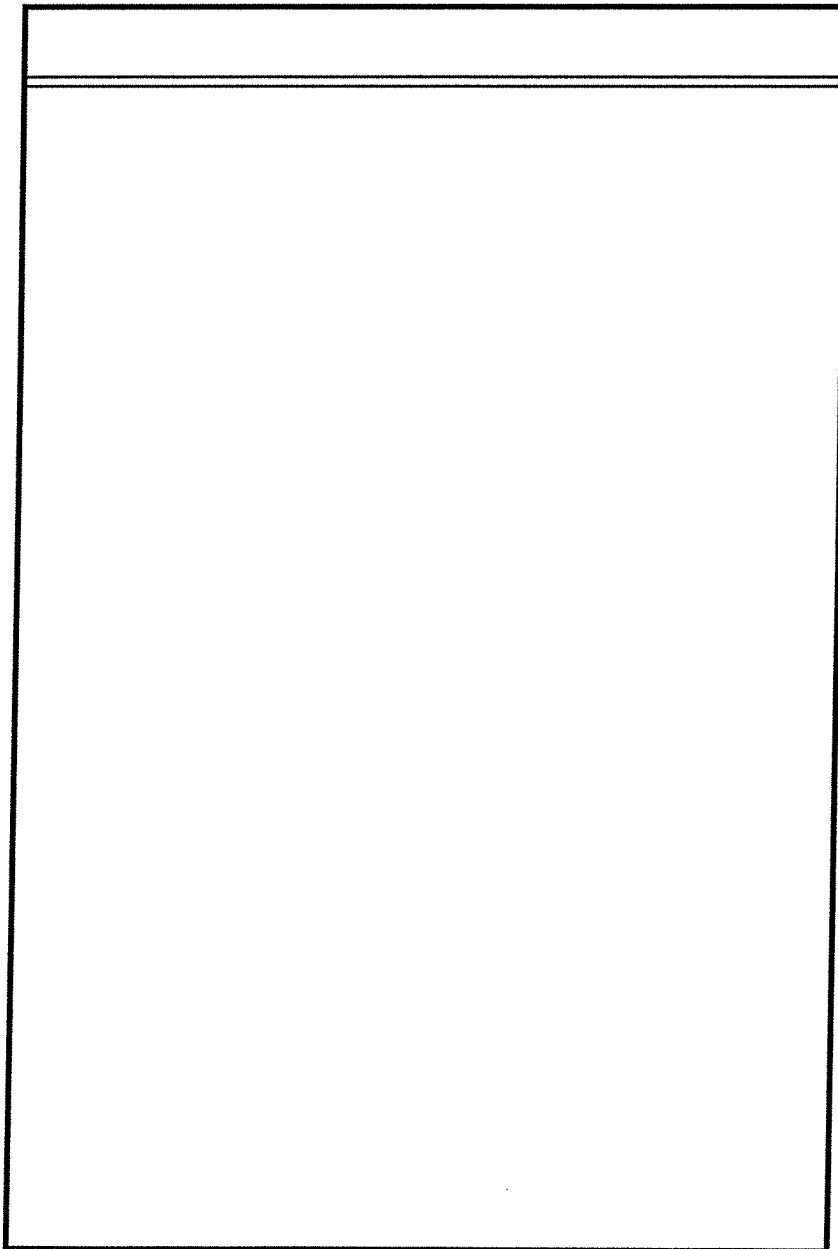

If you have questions about these changes or about the module in general, call Carolina’s product information staff at 800-227-1150 (8 a.m.–5 p.m. ET, M–F), or email stc@carolina.com.
